

We are excited to announce our NEW **CoolView** series window replacements.

CoolView replacements are FAA/PMA approved for existing windows, but with a tremendous **cabin comfort advantage.**

COOLVIEW WINDOW REPLACEMENTS

Why Cool View? Independent testing has proven this unique new window will block up to 82% of the IR (Infrared Ray) or heat coming through the windows. Resulting in a much cooler cabin. In addition, this CoolView window will block virtually all of the UV's (Ultraviolet Rays).

This process is internal, within the window construction. It is not a process or external coating that will wear off or ever need to be reapplied. Along with a much cooler cabin, CoolView will provide a safer environment for your health conscience pilots and passengers.

INDEPENDENT TESTING CONFIRMS:

- Cooler Cabin Temperatures
- Reduces IR (UP TO 82.4%)
- Reduces UV (UP TO 99%)
- Reduces Pilot Fatigue
- Preserves Aircraft Interior

LIGHT TRANSMITTANCE IR PROTECTION/REFLECTION

-50 CoolView	82.4%
-70 CoolView	62.8%

*NIAR UV/Vis/IR Transmittance Testing Report
No. ACL-RP-2017-004N/C dated 28 April 2017

Keep cool with CoolView!
