Outer Pane

LA159SCCE103-003

Middle Pane

LA159SCCE103-011

Inner Pane

LA1159CE20034-ALL

Window Assy

WINDOW ASSEMBLY "1159CE20034-ALL" FOR THE GII, GIII, GIV, G300 & G400

The cabin windows for the GII, GIII, GIV, G300 and G400 consist of four window panes separated by three desiccant air spaces and are vented together. The window panes are all placed together within an intricate assembly and encapsulated by two aluminum metal frames that are sealed for a water tight assembly. Our repair program will separate the assembly and offer the capabilities to inspect, repair and /or replace any discrepant window panes with a new Lee Aerospace FAA PMA approved replacement pane. We will be offering these window assemblies on an overhauled / exchange program and are ready to install in your aircraft.

FAA/EASA REPAIR STATION

SERVICES

Operating a full service manufacturing and repair facility since 1989 in the heart of the United States. Our FAA/EASA Certified Repair Station Technicians are strategically located throughout the U.S., enabling quick response time, meeting customer demands worldwide.

As the industry leader in transparencies, Lee Aerospace's qualified and FAA certified technicians will inspect your aircraft windshields and cabin windows, providing an expert, detailed evaluation on the condition of your windows.

Our Mobile Repair Team will polish, or install new replacement windshields and windows on-site, using factory authorized equipment. Every repair/installation goes through a series of quality checks, ensuring compliance with the aircraft manufacturer, air carrier and other applicable specifications.
