

THE NEW STANDARD IN COMFORT

# COOLVIEW WINDOW UPGRADE

AEROSTRUCTURE ASSEMBLIES | COMPOSITE MANUFACTURING | TRANSPARENCIES | REPAIR & INSTALLATION

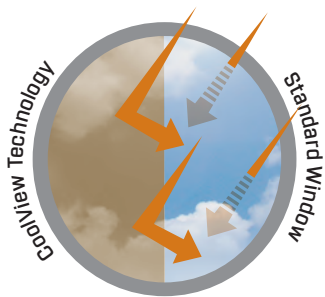

## THE NEW STANDARD IN COMFORT

# COOLVIEW WINDOW UPGRADE

**CoolView by Lee Aerospace is an advanced technology that provides a permanent metallic barrier system as part of the manufacturing process. Engineered for added comfort with cooler cabin temperatures, pilot fatigue protection and the preservation of your aircraft interiors, including polarizers.**

Why CoolView? Independent testing has proven this unique window will block 62.8% or more of the IR (Infrared Rays) or heat coming through the windows, resulting in a much cooler cabin. In addition, our CoolView windows will block virtually all of the UV rays.

Available for new OEM production or aftermarket PMA windows

- ✓ Cooler Cabin Temperatures
- ✓ Reduces IR 62.8% or more
- ✓ Reduces UV 99%
- ✓ Reduces Pilot Fatigue
- ✓ Preserves Aircraft Interior

### INFRARED REDUCTION

**CoolView 62.8% or More**
