

# GULFSTREAM

## GV / G350 / G450 / G550 CABIN WINDOWS

The cabin windows for the GV, G350, G450, and G550 consist of a glass tempered "heated" inner pane and laminated acrylic outer pane assembly. These two windows are mounted into an aluminum frame and sealed water-tight.

Our repair program will separate the assembly, inspect the window panes, and repair or replace the outer laminated pane assembly with a new Lee Aerospace FAA, PMA-approved product.

The windows may also be removed by following the current OEM Aircraft Maintenance Manual instructions for do-it-yourself replacement. The outer laminated assembly is available for individual resale. The complete window assembly is also part of our overhauled exchange program.

# SERVICES

## FAA/EASA REPAIR

As the industry leader in transparencies, Lee Aerospace has been operating a full-service manufacturing and repair facility since 1989.

Our qualified team of FAA-certified technicians can provide you with a detailed inspection, a quick repair, or accurately install a windshield or window on site.

Every repair and installation goes through a series of quality checks, ensuring compliance with the aircraft manufacturer, air carrier, and other applicable specifications.

## LOCATIONS

Our Mobile Aircraft Window Repair Technicians are conveniently located across the U.S.

Having technicians in multiple locations allows us to reach our customers anywhere in the world. No matter where your aircraft is, our window repair technicians are available 24 hours a day, 7 days a week.
